

***** Files contained in VIREX package *****

- VIREX current build
- configure.xml
- test2.dbfile
- Readme.pdf

***** Setting up *****

1. Download and install MySQL server
2. Install sample database by executing the db script (eg. test2.dbfile)
3. Verify the tables are created
4. Setup DB connection string, username, and password in configure.xml

***** Running the application *****

1. Double click on VIREX.jar
2. If it doesn't run, check (1), (2), (3)

Note:

1. Make sure the configure.xml is in the same directory as the VIREX jar file.
2. Make sure the databaseUrl, username, password to the database server are correct.
3. Make sure the database instance is running.
4. Developed and tested on MySQL Server 4.1, MySQL Server 5.0
